What do you need to play the game?

The game is playable on any device with an internet connection, such as a computer or a mobile device.

The game is accessible from the Algowatch project website. Depending on your organisation you may need permission to access the webpage. We suggest you contact your technology or information technology (IT) administrators in advance to check you have access.

The game can be played directly in a browser or downloaded for offline play. Some organisations may prefer that you play in the browser and avoid downloading software.

The game works on any mainstream browser that supports HTML5 (e.g. Firefox, Chrome, Bing) . If available, we recommend using Firefox for the best experience.

To download the game for offline use, you will need a computer running Windows 7 or later.

How do you access the game?

1. Go to Algowatch project website resources and select the sub-section on the game.
2. Go to more information.
3. Select how you want to play the game. Remember you can play in a web browser or download to play locally.
4. You will be asked first to select your language.
5. You can change the language from the main menu by clicking the language button (a globe) on the top right.
6. Choose the Story and minigames mode, or minigames mode only.
7. In both the Story and minigames you can access a range of options via the menu at the top right.
8. Press tab on top right to see the game map
9. You can play with sound or mute the sound.

How is my data managed?

The website will record only how many downloads of the game there are.

This data will be held by project consortium partners and not shared beyond the project consortium. It will be used to assess the reach (downloads) of the game. No personal data will be collected in the game when downloaded.
